

THE A500 MINI

RAM DISK
Workbench 1.3

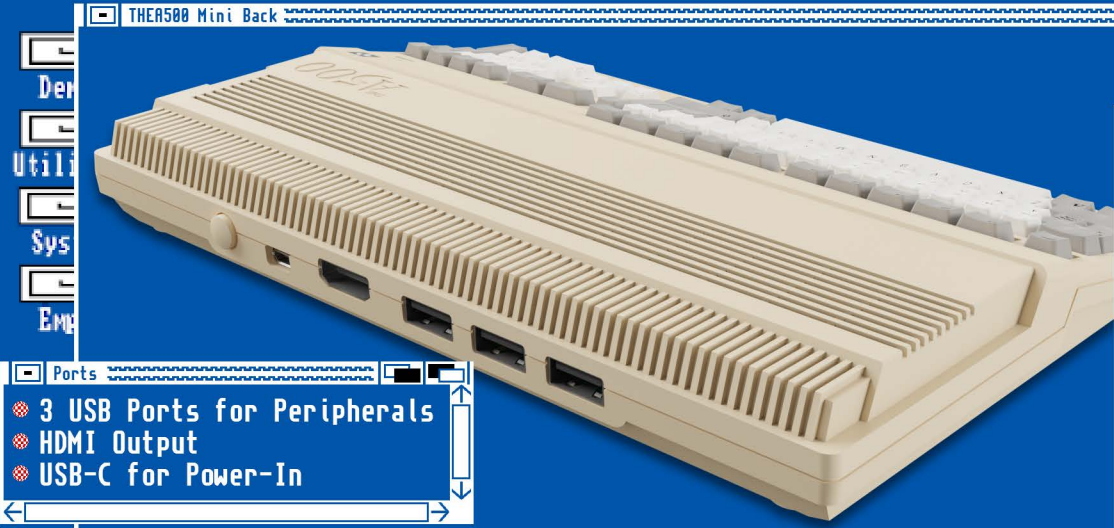

Now other classic consoles are just toys!

Welcome back to the 1980s and the pinnacle of 16-bit home computing. Released in 1987, the **Amiga 500** featured a 16/32-bit CPU, 512Kb of RAM and an array of custom chips for producing best-in-class sound and video.

Introducing **THEA500 Mini**, a compact reimagining of this classic home computer. Featuring perfect emulation of not only the original A500 but also the Advanced Graphics Architecture (AGA) of the A1200. Play one of the included 25 classic Amiga games, selected from a simple to use carousel, including all-time greats like **Alien Breed 3D**, **Another World**, **Simon the Sorcerer** and **Worms**. Or side-load your own games via USB stick with full WHDLoad support and an array of options to choose from. Plus save and resume your game at any time to help you finish those punishingly difficult classics.

THEA500 Mini comes with the original style **2-button mouse** and newly engineered **8-button precision gamepad**, allowing you to choose your control method. To compliment the on-screen keyboard, you can plug in an external standard USB PC keyboard for additional functionality.

- Ports**
- 3 USB Ports for Peripherals
 - HDMI Output
 - USB-C for Power-In

Another World

In this cinematic action adventure you are a young scientist fighting for survival after you are accidentally transported to an alien world.

Try to stay alive until you can acquire a weapon. Fail to dodge a hazard and you'll go back to the start checkpoint. You can skip the introduction and use level code EDUI to jump straight into the action.

Worms

WORMS THE DIRECTORS CUT

The Chaos Engine

In this shoot'em up top-view run and gun game you must battle the Chaos Engine's creations across Victorian England before taking on its inventor Baron Fortesque.

Choose two mercenaries from a group of six. Traverse four landscapes collecting power-ups, gold and keys and solving puzzles. Spend your riches on upgrading your weapons and character attributes.
